TOYOTA MOTOR MANUFACTURING CANADA ANNOUNCES LEADERSHIP CHANGES

CAMBRIDGE, ONTARIO, December 4, 2019 – Toyota Motor North America (TMNA) today announced the appointment of Frank Voss as President of Toyota Motor Manufacturing Canada (TMMC), effective January 1. This announcement follows the decision by Fred Volf, current President of TMMC, to retire effective January 1, after 32 years with Toyota.

Voss, who was most recently the Vice President, Administration and Corporate Secretary at Toyota Motor Manufacturing, Kentucky Inc. (TMMK), replaces Volf as president of TMMC. With over 30 years of automotive manufacturing experience, Voss held several management positions at TMMC before his time at TMMK, including GM of the Lexus Manufacturing Division, GM of Production Control, and GM of Information Systems.

As President of TMMC, Voss will be responsible for all production and administrative functions at the manufacturing facility, which produces the Toyota RAV4, RAV4 Hybrid, Lexus RX 350, and RX 450h. He will report to Brian Krinock, Senior Vice President, Vehicle Manufacturing, Toyota Motor North America (TMNA).

Volf started his Toyota career at TMMC in 1987, as a Facility Engineer before moving quickly to Manufacturing. Prior to his promotion to President in 2015, Fred was Vice President, Manufacturing for Toyota Motor Manufacturing Mississippi (TMMMS), and had been Vice President, Manufacturing at TMMC before that. In his time as President, Fred led the transition at TMMC to build the RAV4, including the new 2019 model built on the TNGA platform.

TMMC has manufactured vehicles in Canada for more than 30 years and currently employs more than 8,500 team members at its facilities in Cambridge and Woodstock, Ontario. Committed to producing vehicles in Canada, Toyota has invested more than CDN \$8.5B in its Canadian operations since 1985, and has built more than eight million vehicles over that period of time.
